Resumo

I have a degree in Computer Science from UNIPÊ and work as
a Web and Mobile Developer, focusing on creating scalable and
efficient solutions, delivering applications with great user experience
– both on the front and back-end.

I have solid experience with React, React Native, Nest.js,
TypeScript, PostgreSQL and GCP (Firebase), accumulated in
projects carried out in companies such as 101 Soluções em
Tecnologia and 7EN Company In these projects, I contributed to
performance improvements (reduction of up to 40% in response
time), increased security (with 2 to 3 layers of protection) and
organization of the code base (following standards such as MVC and
Clean Architecture). I also work with API integration, authentication,
versioning with Git, and automated testing with Jest.

I am currently looking to delve deeper into cloud technologies (AWS
and GCP) and evolve in the areas of DevOps and infrastructure,
exploring tools such as Docker and Kubernetes. I am interested in
working on projects focused on mobile-first, modern architectures
such as microservices, CI/CD, serverless, automated testing, good
clean code practices and scalability.

I am looking for collaborative environments, with an agile culture,
focused on good practices and where I can learn and contribute
with solutions that deliver real value. If you want to exchange ideas
about mobile development, back-end architecture or good practices
in scalable projects, contact me here!

Experiência

self-employed
Desenvolvedor full stack
dezembro de 2024 - maio de 2025 (6 meses)

Brasil

101 Soluções em Tecnologia
2 anos 3 meses

Full Stack Developer | React | Javascript | Python | FastApi | Git |
janeiro de 2024 - junho de 2024 (6 meses)
João Pessoa, Paraíba, Brasil

Position: Full Stack Developer (React + FastAPI + JavaScript + Python +
SQLite)
Stack: React.js, FastAPI, JavaScript, Python, SQLite
Project Description: Web system for ophthalmology consultations and patient
care

Development of a web system for ophthalmology consultations and patient
care, ensuring cross-browser compatibility and security in patient data access.

Responsible for front-end and back-end development, ensuring efficient
integration between the interface, API, and database, while optimizing search
functionality and data security.

Developed the website interface using HTML, CSS, and JavaScript, ensuring a
consistent experience across different browsers.
Implemented the back-end with FastAPI (Python), optimizing patient search
and applying native security features.
Created and integrated the API with React.js and SQLite, ensuring data
persistence and efficient communication between modules.
Conducted in-depth testing to identify and fix bugs, ensuring the system's
correct operation.
Used Git for code versioning, collaborating with the team in code management
and project development.
Development of an efficient and secure system for ophthalmology
consultations, optimizing patient search, improving user experience, and
ensuring well-structured and collaborative code management.

Frontend Mobile Developer | React Native | Javascript | Styled
Component | GCP | Node | Git |
abril de 2022 - dezembro de 2023 (1 ano 9 meses)
João Pessoa, Paraíba, Brasil

Position: Mobile Developer (React Native + JavaScript + Styled-Components +
GCP + Node)

Stack: React Native, JavaScript, Styled-Components, Firebase (GCP), Auth0, Custom CMS with React.js, Git, Scrum

Project Description: Development of a mobile platform for monitoring soccer matches, allowing users to track real-time information, manage content, and perform secure operations within the app.
Led the design and implementation of the user interface, authentication, authorization, and content management systems.
Planned, created, and maintained responsive screens and components using React Native, JavaScript, and Styled-Components.
Implemented authentication and authorization by integrating Auth0 and GCP (specifically Firebase) for data creation, update, and deletion operations.
Developed a CMS with React.js to manage the app's content.
Conducted in-depth testing to identify and fix bugs, utilizing version control systems (Git) and Agile methodologies with Scrum to ensure continuous delivery.
A robust and responsive platform with high performance and security.
The adopted practices resulted in a collaborative and efficient workflow, ensuring project goals were met and enhancing the user experience.

7EN Company
Full Stack Developer | React | CSS | Nest | Postgres | Git | Scrum | Heroku
fevereiro de 2023 - janeiro de 2024 (1 ano)
Cabedelo, Paraíba, Brasil

Position: Full Stack Developer (React + Nest + Postgres + Scrum + Heroku)

Stack: React.js, TypeScript, Nest.js, PostgreSQL, JWT (JSON Web Token), Git, Scrum, Jest

Project Description:
The project involves the development of an online learning platform aimed at beginner developers.

The platform is designed to ensure cross-browser compatibility, providing an accessible and responsive experience for users.

Responsibilities include creating intuitive interfaces, consuming APIs, and managing data persistence using technologies such as React.js, TypeScript,

PostgreSQL, and Nest.js. Additionally, server-side logic is implemented, and efficient integration with the database is ensured.

The application is developed and structured with Nest.js internal modules, version control is applied using Git for efficient collaboration, in-depth testing is performed to identify and fix bugs, and agile methodologies such as Scrum are used to ensure a continuous delivery flow.

The result is a functional and accessible platform, providing a consistent experience for users, greater development efficiency, team collaboration, and continuous delivery aligned with project goals.

Autónomo
Full Stack Developer | React | CSS | Spring Framework | MySql | Git & Github |
fevereiro de 2022 - julho de 2022 (6 meses)
Cabedelo, Paraíba, Brazil

Full Stack Developer (React + Spring Framework + MySQL + Git)

Project Description:
Development of a system for a local supermarket aimed at improving sales management and inventory control.

Stacks: HTML, CSS, JavaScript, React.js, TypeScript, Java 11, Spring Boot, PostgreSQL, Git

Frontend Development: Created a responsive system using HTML, CSS, and JavaScript to ensure consistent user experience across different browsers. Implemented compatibility tests for multi-browser functionality.
API and Data Persistence: Developed dynamic React.js interfaces with TypeScript, integrating them with a Spring Boot backend. Configured PostgreSQL for efficient data storage and communication between front-end and back-end.
Server-Side Logic: Developed Java-based server logic with Spring Boot and PostgreSQL. Created RESTful services and endpoints for handling requests and managing data.
Testing and Quality Assurance: Conducted unit and integration tests to identify and fix bugs, improving system stability and performance.
Version Control: Managed code using Git, ensuring efficient team collaboration through commits, merges, and version tracking.

The system functions consistently across browsers, with dynamic interfaces and efficient database interaction. The code is well-organized and stable, ensuring reliable performance and seamless collaboration in the development process.

Unipê - Centro Universitário de João Pessoa
1 ano

Extensionista Unity fabrica de software - UNIPÊ | Unity | C# | Scrum |
agosto de 2019 - julho de 2020 (1 ano)
João Pessoa, Paraíba, Brasil

- Desenvolvimento de jogos 2D utilizando a C# e Unity Engine
- Desenvolver e planejar ações e mecanicas dos personagem
- Criação de logica dos personagem usando modulos internos da unity
- Realização de testes para analises profundos para corrigir, identificar problemas, bugs e erros.
- Uso de sistemas de controle de versionamento de codigo(Git) para o gerenciamento do codigo e gestao de codigo.

Desenvolvedor de banco de dados
setembro de 2019 - novembro de 2019 (3 meses)
João Pessoa e Região
